EDUCATION

Bachelor of Science in Computer Science (Software Engineering), Minor in Business

Expected May 2027

Arizona State University, Tempe, AZ

3.8 GPA

- *Relevant Coursework: Software Engineering, Data Structures and Algorithms, Object Oriented Programming & Data Structures, Principles of Programming, Information Assurance, Assembly Language, Programming Languages*
- *Organizations: Alpha Kappa Psi, Software Development Association*

EXPERIENCE

BumperBites, Tempe, AZ: Software Engineering Intern

Incoming

Sang Vietnamese Coffee, Tempe, AZ: Field Marketing Associate

Jul 2024 - Present

- *Analyzed sales data from 30+ retail locations to identify high-performing stores and guide marketing strategy, resulting in a 30% sales increase across Arizona.*
- *Represented the company at 8+ trade shows, pitching products to 500+ customers and partners to expand investor interest and strengthen brand presence statewide.*

RELEVANT PROJECTS

NFL Touchdown Predictor, *Personal Project*

Nov 2025

- *Developed ML pipeline using scikit-learn Linear Regression achieving 0.4 R^2 and 8.35 RMSE through feature engineering*
- *Improved linear regression performance 150% via pandas/NumPy feature engineering on 50K+ NFL play records*
- *Built temporal validation framework training on 2023-2024 data, testing on 2025 with matplotlib visualization*

WasteNotPromptNot, 3rd Place at SunHacks

Sep 2025

- *Built a full-stack Chrome extension using Firebase Cloud Functions to detect and remove “wasteful” text in real time, reducing average prompt length by 25% and improving API throughput efficiency and placing 3rd place out of all teams.*
- *Leveraged vector embeddings to calculate semantic similarity and estimate waste probability, cutting unnecessary token usage by an estimated 30% per query, leading to potential compute cost savings in the millions at scale.*
- *Designed and prototyped an intuitive UI in Figma, featuring dynamic badges, modals, and cleanup buttons that improved usability and made optimization effortless for end users.*

RecipeAI, *Personal Project*

Jul 2025

- *Developed a full-stack React.js web application that generated 200+ personalized AI recipes through Claude API*
- *Engineered asynchronous data flows with API fetching, state management, and input-driven prompt generation.*
- *Designed a modular, responsive UI using React component architecture and CSS-based layout.*

CERTIFICATES

Querying Data Certification – The Global Career Accelerator

- *Applied SQL to query, join, and clean large-scale datasets, developing efficient, maintainable code to extract insights and support data-driven software features.*
- *Strengthened software engineering fundamentals through hands-on experience in database design, debugging, and problem-solving, translating complex data into actionable solutions for business use cases.*

Data Analysis – The Global Career Accelerator

- *Processed and analyzed Grammy.com datasets using Python's data science stack, leveraging NumPy for numerical computing and array-based data manipulation to derive audience insights*
- *Engineered end-to-end data analysis pipelines with Python, utilizing NumPy for statistical analysis and computational operations to support content strategy recommendations*

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, Python, C++, MATLAB

Front-End: HTML, CSS, React.JS, Tailwind

Tools, Databases, and OS: Node.JS, PostgreSQL, Firebase, Git, GitHub, Windows, Linux, Jupyter
