## EDUCATION

**Bachelor of Science in Computer Science (Software Engineering), Minor in Business**

Expected May 2027

Arizona State University, Tempe, AZ

**3.8 GPA**

- *Relevant Coursework: Software Engineering, Data Structures and Algorithms, Object Oriented Programming & Data Structures, Principles of Programming, Information Assurance, Assembly Language, Programming Languages*
- *Organizations: Software Development Association*

## EXPERIENCE

**BumperBites, Tempe, AZ: Software Engineering Intern**

*Incoming*

**Sang Vietnamese Coffee, Tempe, AZ: Field Marketing Associate**

*Jul 2024 - Present*

- *Analyzed sales data from 30+ retail locations to identify high-performing stores and guide marketing strategy, resulting in a 30% sales increase across Arizona.*
- *Represented the company at 8+ trade shows, pitching products to 500+ customers and partners to expand investor interest and strengthen brand presence statewide.*

## RELEVANT PROJECTS

**NFL Stats Predictor, *Personal Project***

*Nov 2025*

- *Developing predictive models using Python and Pandas to analyze NFL player/team performance data.*
- *Implementing data preprocessing and statistical analysis on 1000+ data points per season.*
- *Building machine learning algorithms to forecast game outcomes and player statistics.*

**WasteNotPromptNot, *3<sup>rd</sup> Place at SunHacks***

*Sep 2025*

- *Built a full-stack Chrome extension using Firebase Cloud Functions to detect and remove “wasteful” text in real time, reducing average prompt length by 25% and improving API throughput efficiency and placing 3rd place out of all teams.*
- *Leveraged vector embeddings to calculate semantic similarity and estimate waste probability, cutting unnecessary token usage by an estimated 30% per query, leading to potential compute cost savings in the millions at scale.*
- *Designed and prototyped an intuitive UI in Figma, featuring dynamic badges, modals, and cleanup buttons that improved usability and made optimization effortless for end users.*

**Chef Claude Web App, *Personal Project***

*Jul 2025*

- *Developed a React.js web app that generated 200+ AI-powered recipes through real-time integration with Claude API.*
- *Implemented Firebase for backend services using real-time database storage and user authentication.*

**Project Spyn, *Class Project***

*Dec 2024*

- *Led a team of 4 engineers to design and end to end program a fully autonomous self-driving Lego car using MATLAB.*
- *Engineered distance sensors to detect obstacles, telling the car to stop and turn dynamically when approaching walls.*
- *Architected a comprehensive computer vision system for traffic light recognition using color detection algorithms, while simultaneously designing and implementing pickup/drop-off mechanism to simulate passenger transportation scenarios*

## CERTIFICATES

**Querying Data Certification – The Global Career Accelerator**

- *Applied SQL to query, join, and clean large-scale datasets, developing efficient, maintainable code to extract insights and support data-driven software features.*
- *Strengthened software engineering fundamentals through hands-on experience in database design, debugging, and problem-solving, translating complex data into actionable solutions for business use cases.*

**Data Analysis – The Global Career Accelerator**

- *Processed and analyzed Grammy.com datasets using Python's data science stack, leveraging NumPy for numerical computing and array-based data manipulation to derive audience insights*
- *Engineered end-to-end data analysis pipelines with Python, utilizing NumPy for statistical analysis and computational operations to support content strategy recommendations*

## TECHNICAL SKILLS

**Programming Languages:** Java, JavaScript, Python, C++, MATLAB

**Front-End:** HTML, CSS, React.JS, Tailwind

**Tools, Databases, and OS:** Node.JS, PostgreSQL, Firebase, Git, GitHub, Windows, Linux
